# ANALYTIC SUBJECT INDEX

*Acoustic virial coefficients* (see *Argon*) 156 (1989) 899
*Adsorption, critical* (see *Polymer solution*) 156 (1989) 114
*$Ag_3SbS_3$*
– Isothermal phase behavior of—, $ZnGeP_2$ and ZnS - Block et al. 156 (1989) 341
*Alkanes*
– A corresponding-states correlation of spin relaxation in normal— - Zega et al. 156 (1989) 277
*Argon*
– Thermal conductivity of dense noble gases - Le Neindre et al. 156 (1989) 512
– Transport coefficients of simple fluids in a density range from the solid to the dilute gas - van Loef and Cohen 156 (1989) 522
– Second acoustic virial coefficients of—between 100 and 304 K - Ewing et al. 156 (1989) 899
*Argon* (see *Viscosity of argon*) 156 (1989) 921
*Arsenic*
– Disorder-induced piezoelectric and piezo-optic effects. II. Piezoelectric effects in amorphous germanium dioxide,—, and boric oxide - Klug and Whalley 156 (1989) 376
*Atom–radiation interaction* (see *N-level atom, (N−1) mode system*) 156 (1989) 689

*Benzene* (see *Chlorobenzene*) 156 (1989) 534
*Biaxial nematic phase*
– Elastic constants of a biaxial nematic liquid crystal - Kini and Chandrasekhar 156 (1989) 364
*Binary liquid mixtures*
– Low-frequency dielectric dispersion and electric conductivity near the consolute point in some— - Thoen et al. 156 (1989) 92
*Binary mixtures*
– Experimental cross virial coefficients for—of carbon dioxide with nitrogen, methane and ethane at 300 and 320 K - Brugge et al. 156 (1989) 382
*Boltzmann equation*
– Influence of collisions on the fluctuations of a distribution function in a rarefied gas - Malomed and Staroselsky 156 (1989) 726
*Boric oxide*
– Disorder-induced piezoelectric and piezo-optic effects. II. Piezoelectric effects in amorphous germanium dioxide, arsenic, and— - Klug and Whalley 156 (1989) 376
*Bose–Einstein condensation*
– Spin-polarized atomic hydrogen and deuterium quantum gases - Walraven 156 (1989) 227
*Boundary condition dependence* (see *Random β-model*) 156 (1989) 613
*Breaking of weak waves* (see *Gas flow*) 156 (1989) 936
*Brownian motion, correlated* (see *Tracer diffusion*) 156 (1989) 575
*Bulk modulus* (see *Phase behavior, isothermal*) 156 (1989) 341
*Burnett apparatus* (see *Binary mixtures*) 156 (1989) 382

*Car parking problem*
– The—at high densities - Burgos and Bonadeo 156 (1989) 713

*Carbon, elemental*
– Pressure–temperature phase diagram of elemental carbon - Bundy 156 (1989) 169
*$CdPS_3$* (see *Pyridine intercalated $CdPS_3$*) 156 (1989) 203
*$CHF_3$*
– The static dielectric constant of $CH_3F$ and—to 468 K and 2000 bar - Reuter et al. 156 (1989) 294
*Chlorobenzene*
– Thermal conductivity of—at pressures up to 430 MPa - Nieto de Castro et al. 156 (1989) 534
*$CH_3F$*
– The static dielectric constant of—and $CHF_3$ to 468 K and 2000 bar - Reuter et al. 156 (1989) 294
*Colloidal dispersion*
– Adhesive hard sphere dispersions. V. Observation of spinodal decomposition in a— - Rouw et al. 156 (1989) 876
*Correlation scheme* (see *Polyatomic gases*) 156 (1989) 467
*Corresponding-states correlation* (see *Alkanes*) 156 (1989) 277
*Corresponding-states principle* (see *Viscosity correlation of $H_2O$ and $D_2O$*) 156 (1989) 547
*$CO_2+CH_4$*
– Experimental cross virial coefficients for binary mixtures of carbon dioxide with nitrogen, methane and ethane at 300 and 320 K - Brugge et al. 156 (1989) 382
*$CO_2+C_2H_6$*
– Experimental cross virial coefficients for binary mixtures of carbon dioxide with nitrogen, methane and ethane at 300 and 320 K - Brugge et al. 156 (1989) 382
*$CO_2+N_2$*
– Experimental cross virial coefficients for binary mixtures of carbon dioxide with nitrogen, methane and ethane at 300 and 320 K - Brugge et al. 156 (1989) 382
*Critical exponents* (see *Percolation, random-site*) 156 (1989) 781
*Critical-point behavior* (see *Ising model, three-dimensional*) 156 (1989) 35
*Critical points characterization*
– —using probability distributions. III. Ferromagnetic phase transition - Güémez et al. 156 (1989) 823
*Critical solution point* (see *Polymer solution*) 156 (1989) 114
*Critical solution temperature* (see *Ultracentrifuge*) 156 (1989) 77
*Crystal-field contributions* (see *Paramagnetic ion complexes*) 156 (1989) 924
*$CsHSO_4$*
– Pressure dependence of phase transitions in—studied with differential scanning calorimetry - Baranowski et al. 156 (1989) 353
*$CsReO_4$*
– A high-pressure Ramam study of $KReO_4$, $RbReO_4$ and—to 25 GPa and pressure-induced phase transitions - Jayaraman et al. 156 (1989) 325

*Damping, quantum*
– Incoherent tunneling at weak bias: weak quantum damping - Dekker 156 (1989) 756
*Deuterium* (see *Quantum gases*) 156 (1989) 227
*Diamond anvil cell* (see *Perrehenates*) 156 (1989) 325
*Diamond anvil cell* (see *Phase behavior, isothermal*) 156 (1989) 341
*Diamond* (see *Carbon, elemental*) 156 (1989) 169
*Dielectric constant, high-pressure* (see *Fluoromethanes*) 156 (1989) 294
*Dielectric dispersion* (see *Binary liquid mixtures*) 156 (1989) 92
*Differential approximants* (see *Ising model, three-dimensional*) 156 (1989) 35

*Differential scanning calorimetry*
– The thermodynamic discontinuities $\Delta S$, $\Delta H$, $\Delta V$, and the melting line of molecular systems at high pressure - Schouten and van der Putten 156 (1989) 303
*Differential scanning calorimetry* (see *$CsHSO_4$*) 156 (1989) 353
*Discontinuities, thermodynamic* (see *Molecular systems at high pressure*) 156 (1989) 303
*Disordered materials*
– High-pressure deuterium solid-state NMR study of the dynamics of pyridine intercalated $CdPS_3$ - McDaniel et al. 156 (1989) 203
*Disordered solids*
– Disorder-induced piezoelectric and piezo-optic effects. II. Piezoelectric effects in amorphous germanium dioxide, arsenic, and boric oxide - Klug and Whalley 156 (1989) 376
*Dispersions, hard sphere*
– Adhesive hard sphere dispersions. V. Observation of spinodal decomposition in a colloidal dispersion - Rouw et al. 156 (1989) 876
*Divergence, small-distance* (see *Boltzmann equation*) 156 (1989) 726
*$D_2O$*
– Unified approach to correlating the viscosities of $H_2O$ and—in the liquid and gaseous phases - Matsunaga et al. 156 (1989) 547

*Elastic constants* (see *Liquid crystals*) 156 (1989) 364
*Electric conductivity* (see *Binary liquid mixtures*) 156 (1989) 92
*Electrolytes* (see *Yukawa potential*) 156 (1989) 15
*Electronic phenomena*
– Pressure tuning and electronic phemomena - Drickamer 156 (1989) 179
*Ellipsometry* (see *Polymer solution*) 156 (1989) 114

*Fluid of spherocylinders* (see *Nucleation, crystal*) 156 (1989) 599
*Fluids, simple*
– Transport coefficients of simple fluids in a density range from the solid to the dilute gas - van Loef and Cohen 156 (1989) 522
*Fluoromethanes*
– The static dielectric constant of $CH_3F$ and $CHF_3$ to 468 K and 2000 bar - Reuter et al. 156 (1989) 294
*4f ion complexes*
– Calculations of relativistic crystal-field contributions to the zero-field splittings in 4f and 3d ion complexes - Tuszyński and Dixon 156 (1989) 924
*Fractal dimension* (see *Percolation, random-site*) 156 (1989) 781
*Fracture propagation*
– —governed by the Laplace equation - Taguchi 156 (1989) 741
*Fragmentation process* (see *Random $\beta$-model*) 156 (1989) 613

*Gas flow*
– Non-linear breaking of weak waves in a thermally conducting and dissociating—- Rai et al. 156 (1989) 936
*Gas–mica interaction* (see *Knudsen particle flow*) 156 (1989) 492
*Germanium dioxide*
– Disorder-induced piezoelectric and piezo-optic effects. II. Piezoelectric effects in amorphous—, arsenic, and boric oxide - Klug and Whalley 156 (1989) 376

*Ground-state properties* (see *Metallic lithium*) 156 (1989) 144

*Hard core molecules* (see *Nucleation, crystal*) 156 (1989) 599
*HD gas*
– Nuclear spin multiplet collapse in— - Carr 156 (1989) 212
*Heat-conductivity time correlation functions* (see *Plasma, magnetized*) 156 (1989) 795
*Helium*
– Thermal conductivity of dense noble gases - Le Neindre et al. 156 (1989) 512
*High-pressure conductivity* (see *Chlorobenzene*) 156 (1989) 534
*High-pressure phase transitions* (see *$CsHSO_4$*) 156 (1989) 353
*High-pressure science*
– Van der Waals Fund, van der Waals Laboratory and Dutch— - Levelt Sengers and Sengers 156 (1989) 1
*High-pressure spectroscopy* (see *Electronic phenomena*) 156 (1989) 179
*$H_2O$*
– Unified approach to correlating the viscosities of—and $D_2O$ in the liquid and gaseous phases - Matsunaga et al. 156 (1989) 547
*Hydrocarbon–fluorocarbon mixtures* (see *Ultracentrifuge*) 156 (1989) 77
*Hydrogen* (see *Quantum gases*) 156 (1989) 227

*Insulators*
– NMR relaxation mechanisms and line widths in—below 1 K - Gonen and Waugh 156 (1989) 219
*Integral equation, parametric*
– Calculation of thermodynamic properties from a parametric integral equation - Peters and Lichtenthaler 156 (1989) 417
*Intercalated compound* (see *Pyridine intercalated $CdPS_3$*) 156 (1989) 203
*Interface, liquid–gas* (see *Polymer solution*) 156 (1989) 114
*Intermolecular potential* (see *Yukawa potential*) 156 (1989) 15
*Ising model, three-dimensional*
– The three-dimensional Ising model revisited numerically - Liu and Fisher 156 (1989) 35
*Ising model* (see *Critical points characterization*) 156 (1989) 823
*Isothermal compressibility* (see *1,1- difluoroethane*) 156 (1989) 454

*Jaynes–Cummings model*
– A generalized—for the $N$-level atom and $(N-1)$ modes - Abdel-Hafez et al. 156 (1989) 689

*Kerr constant*
– The—of a microemulsion for a low volume fraction of water - van der Linden et al. 156 (1989) 130
*Kinetic theory* (see *Plasma, magnetized*) 156 (1989) 795
*Knudsen particle flow*
– Rotational polarization in a Knudsen flow; various gases on mica between 293 and 666 K - Horne and Hermans 156 (1989) 492
*Korenman model* (see *Quantum field system, thermally dissipative*) 156 (1989) 853
*$KReO_4$*
– A high-pressure Ramam study of—, $RbReO_4$ and $CsReO_4$ to 25 GPa and pressure-induced phase transitions - Jayaraman et al. 156 (1989) 325
*Krypton*
– Thermal conductivity of dense noble gases - Le Neindre et al. 156 (1989) 512

*Langevin equations* (see *Transient stochastic dynamics*) 156 (1989) 628

*Laplace equation* (see *Fracture propagation*) 156 (1989) 741
*Lennard-Jones potential* (see *Integral equation, parametric*) 156 (1989) 417
*Liquid crystals*
– Elastic constants of a biaxial nematic liquid crystal - Kini and Chandrasekhar 156 (1989) 364
*Lithium,metallic*
– Ground-state properties of metallic lithium - Sugiyama et al. 156 (1989) 144

*Melting line* (see *Molecular systems at high pressure*) 156 (1989) 303
*Metallic lithium*
– Ground-state properties of— - Sugiyama et al. 156 (1989) 144
*Metastable smetic phase* (see *Nucleation, crystal*) 156 (1989) 599
*Methane*
– Transport coefficients of simple fluids in a density range from the solid to the dilute gas - van Loef and Cohen 156 (1989) 522
*Microemulsion* (see *Kerr constant*) 156 (1989) 130
*Molecular dynamics simulation* (see *Nucleation, crystal*) 156 (1989) 599
*Molecular systems at high pressure*
– The thermodynamic discontinuities $\Delta S$, $\Delta H$, $\Delta V$, and the melting line of— - Schouten and van der Putten 156 (1989) 303
*Molecule–surface interaction* (see *Knudsen particle flow*) 156 (1989) 492
*Monte Carlo calculations, quantum* (see *Metallic lithium*) 156 (1989) 144
*Monte Carlo study* (see *Percolation, random-site*) 156 (1989) 781
*Multifractal cascades*
– —with interactions - Siebesma et al. 156 (1989) 613
*Multifractality* (see *Fracture propagation*) 156 (1989) 741

*N-level atom, (N – 1) mode system*
– A generalized Jaynes–Cummings model for the $N$-level atom and ($N$-1) modes - Abdel-Hafez et al. 156 (1989) 689
*NMR* (see *Alkanes*) 156 (1989) 277
*NMR* (see *HD gas*) 156 (1989) 212
*NMR* (see *Insulators*) 156 (1989) 219
*NMR* (see *Pyridine intercalated $CdPS_3$*) 156 (1989) 203
*NMR spin-echo technique* (see *Xenon*) 156 (1989) 260
*Noble gases, dense*
– Thermal conductivity of dense noble gases - Le Neindre et al. 156 (1989) 512
*Nucleation, crystal*
– Computer simulation of crystal nucleation of parallel hard spherocylinders - Veerman and Frenkel 156 (1989) 599

*1,1- difluoroethane*
– Thermodynamic properties of 1,1-difluoroethane in the super-critical and high-density regions - Iso and Uematsu 156 (1989) 454

*Ornstein–Zernike theory* (see *Yukawa potential*) 156 (1989) 15
*Oscillator, metastable* (see *Quantum damping, weak*) 156 (1989) 756

*Paramagnetic ion complexes*
– Calculations of relativistic crystal-field contributions to the zero-field splittings in 4f and 3d ion complexes - Tuszyński and Dixon 156 (1989) 924
*Penetrable spherical sinks* (see *Periodic array of sinks*) 156 (1989) 835

*Percolation, random-site*
– Critical properties of random-site percolation in two and three dimensions: a Monte Carlo study - Corsten et al. 156 (1989) 781
*Periodic array of sinks*
– Reaction–diffusion on a periodic array of penetrable spherical sinks - Venema and Bedeaux 156 (1989) 835
*Perrehenates*
– A high-pressure Ramam study of $KReO_4$, $RbReO_4$ and $CsReO_4$ to 25 GPa and pressure-induced phase transitions - Jayaraman et al. 156 (1989) 325
*Phase behavior, isothermal*
– Isothermal phase behavior of $Ag_3SbS_3$, $ZnGeP_2$ and ZnS - Block et al. 156 (1989) 341
*Phase diagram* (see *Carbon, elemental*) 156 (1989) 169
*Phase separation* (see *Colloidal dispersion*) 156 (1989) 876
*Phase transitions* (see *$CsHSO_4$*) 156 (1989) 353
*Piezoelectric effects* (see *Disordered solids*) 156 (1989) 376
*Plasma, magnetized*
– Long-time tails of the heat-conductivity time correlation functions for a magnetized plasma: a kinetic-theory approach - Schoolderman and Suttorp 156 (1989) 795
*Plasmas, Vlasov type* (see *Vlasov equation, nonlinear*) 156 (1989) 651
*Polarizability, optical*
– The Kerr constant of a microemulsion for a low volume fraction of water - van der Linden et al. 156 (1989) 130
*Polarization, rotational* (see *Knudsen particle flow*) 156 (1989) 492
*Polyatomic gases*
– A correlation scheme for the thermal conductivity of—at low density - Uribe et al. 156 (1989) 467
*Polymer solution*
– Critical adsorption at the surface of a—. Analysis of ellipsometric data on the depletion layer near the critical solution point - Süssmann and Findenegg 156 (1989) 114
*Polymers, linear*
– Real space renormalization group approach to the theta point of a linear ploymer in 2 and 3 dimensions - Maritan et al. 156 (1989) 679
*Pressure tuning*
– —and electronic phemomena - Drickamer 156 (1989) 179
*Probability distributions* (see *Critical points characterization*) 156 (1989) 823
*Projection operator technique* (see *Spin–bath coupling*) 156 (1989) 244
*PVT properties of water*
– *PVT* properties and vapor-pressures of ordinary water substance in the critical region - Morita et al. 156 (1989) 436
*Pyridine intercalated $CdPS_3$*
– High-pressure deuterium solid-state NMR study of the dynamics of— - McDaniel et al. 156 (1989) 203

*Quantum damping, weak*
– Incoherent tunneling at weak bias: weak quantum damping - Dekker 156 (1989) 756
*Quantum field system, thermally dissipative*
– Self-consistent analysis of a thermally dissipative quantum field system: Korenman's model - Hardman et al. 156 (1989) 853
*Quantum gases*
– Spin-polarized atomic hydrogen and deuterium — - Walraven 156 (1989) 227

*Radial distribution function* (see *Integral equation, parametric*) 156 (1989) 417
*Radial distribution functions* (see *Random sequential systems*) 156 (1989) 713
*Raman spectroscopy, high-pressure* (see *Perrehenates*) 156 (1989) 325
